

GoPro LUTs Color Grading Pack

by IWLTBAP

What is a LUT?

A LUT, for Look-Up Table, is a file (.CUBE or .3DL extension) containing math instructions to replace a color by another one. It's like a color grading preset. This process is done pixel by pixel with a very high accuracy. These LUTs are compatible with many photo and video applications on Mac and PC (list below).

About this pack

Here is a pack of unique LUTs, made by me, especially for the GoPro and action cameras footages, for an easy color grading process.

The LUTs can be used with the most photo and video editing softwares (PC/Mac) :

- Adobe Photoshop (CS6 and +)
- Adobe After Effects (CS6 and +)
- Adobe Premiere Pro (CS6 and +)
- Adobe SpeedGrade
- Avid Media Composer (7 and +)
- The Foundry Nuke
- DaVinci Resolve
- CineForm GoPro Studio Premium
- CyberLink ColorDirector 4
- Final Cut Pro X
- Sony Vegas
- Affinity Photo
- HitFilm 4 Pro
- and more

For **Adobe Premiere Pro CC 2015.3, 2017 and more recent**, here is how to install and use:

Mac: <https://vimeo.com/197112054>

Windows: <https://vimeo.com/197124387>

For **Adobe Premiere Pro CC 2015 (not 2015.3)**, here is how to install and use:

Mac: <https://vimeo.com/197127837>

Windows: <https://vimeo.com/197135144>

For **Adobe After Effects CS6 and Premiere CS6**, you need Magic Bullet LUT Buddy (free plugin):

For **Final Cut Pro X**, you need a LUT plugin like the free one by motionVFX :

<https://www.motionvfx.com/mplugins-107.html>

Or the LUT Utility plugin (\$29) by Color Grading Central :

<http://www.colorgradingcentral.com/lututility>

Or the Color Finale plugin (\$99) by Color Grading Central:

How to use

In your video editing application, you have just to load a LUT file to apply a look, very simple.

In After Effects, load a LUT via *Effects > Utility > Apply Color LUT*.

In Premiere Pro, load a LUT via *Lumetri* effect.

In the folder *Utilities* you will find a LUT named *Cirion*. This LUT will intelligently « flat » your footage to avoid too high contrast and excessive saturation. You have to apply this LUT before any other color grading settings.

LUT Generator (Mac/PC application)

This utility will help you to create your own look LUTs from any applications such as Camera Raw, DxO or simply Lightroom presets!

I made few video tutorials to explain how to use (on the webpage, URL below).

This application is based on pay-what-you-want model, so you can download it for free if you want :)

Install LUTs into Adobe Premiere Pro CC 2015 and +

For **Adobe Premiere Pro CC 2015.3 / 2017 and more recent**, follow these videos:

- Mac: <https://vimeo.com/197112054>
- Windows: <https://vimeo.com/197124387>

For **Adobe Premiere Pro CC 2015 (not 2015.3)**, please follow these videos:

- Mac: <https://vimeo.com/197127837>
- Windows: <https://vimeo.com/197135144>

For **Adobe Premiere Pro CC (2014)**, please follow this video:

- Mac/Windows: <https://youtu.be/PvjHqNlrCJw>

If you want to install the LUTs in **Basic Correction** rather than **Creative** section of the Lumetri panel, just place the **.CUBE files** into:

- **Mac:** /Applications/Adobe Premiere Pro CC 2015/Adobe Premiere Pro CC 2015.app/Contents/Lumetri/LUTs/Technical
- **PC:** C:\Program Files\Adobe\Adobe Premiere Pro CC 2015\Lumetri\LUTs\Technical

Install LUTs into Adobe Photoshop CS6 and +

To use the LUTs via the dropdown menu of the "Color Lookup" adjustment layer, just copy the **.CUBE files** into:

- **Mac:** /Applications/Adobe Photoshop CC 2017/Presets/3DLUTs
- **PC:** C:\Program Files\Adobe\Adobe Photoshop CC 2017\Presets\3DLUTs
